

How to translate the website into other languages

For those who do not speak one of the languages on the site and would prefer their mother tongue, we present a very easy way of translating the site, without installing software or plug-ins. Here is the procedure:

1. Go to the Google® Translate site, <https://translate.google.com/> , and choose the original language of the site in the box on the left-hand side;

2. Choose Italian, the site's original language;

3. Choose your language in the box on the right-hand side;

4. For example, you might choose Tagalog;

5. Enter the link to the site in the box on the left-hand side, <https://exciting-knuth.178-32-140-152.plesk.page/> ; and a link will automatically appear in the box on the right-hand side;

6. Click on this link and another window will open in which the translated site is presented. Additionally, we can navigate within the site without translating each individual page in the manner described above.
